

Research Study Seeking Volunteers

My name is Michael Robinson and I am a doctoral student at Saint Louis University with 15 years experience as a mental health professional.

I am conducting a research study about the perceived effects of involuntary psychiatric hospitalization on family dynamics when a family member was involved in committing a relative. If you have been involved in the psychiatric commitment of a family member, I want to hear your story.

If you are willing to be interviewed for 90 to 120 minutes about yourself, your family, your experience with the commitment process, and changes in your family experience, and have one follow-up phone call of less than 30 minutes,

PLEASE CONTACT ME at 1-866-628-9868 or (573) 248-9285.

Confidentiality of all participants will be maintained, and all participation is voluntary, with all subjects having the right to dropout at any time.

Thank you for your consideration.
